TIDECHALLENGE · 2026 OFF-SEASON · AN FRC GAME BY TIDECREW

Make ice cream. Serve it fast. Check out.

Two ALLIANCES of 2 ROBOTS run an ice cream shop: grab a CONE, stack SCOOPS on it with the help of HOOPS, carry the ICE CREAM out of the shop and deliver it before the other shop does. Taller ice cream scores more, and topping it with your own color scores a lot more.

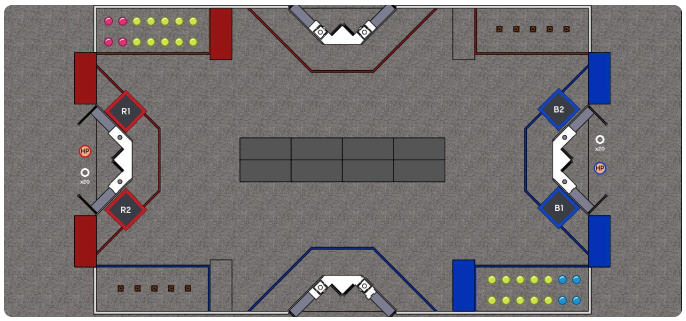

2 v 2 — ROBOTS PER MATCH

2:30 — 15 S AUTO · 2:15 TELEOP

Last 0:30 — END GAME · CHECKOUT

TIER 5 — MAX 5 SCOOPS PER ICE CREAM

01 The FIELD

552 × 360 in FIELD, shown at MATCH start. Each ALLIANCE has a FREEZER (SCOOPS), a STORAGE (CONES, at the far end), a SCOOPING STATION, a DELIVERY ZONE and a CHECKOUT ZONE in the middle. SCOOPING STATIONS and DELIVERY ZONES each have a SAFE ZONE.

02 How an ICE CREAM is made

1. **Grab a CONE** from your STORAGE and place it at your SCOOPING STATION.
2. **Stack SCOOPS.** Your HUMAN PLAYER places a HOOP (one hand) between every pair of SCOOPS. No HOOP, no stacking.
3. **Leave the shop.** Until the CONE tip has fully left the station, every piece counts as its own SCORING ELEMENT.
4. **Deliver it** on a raised DELIVERY TRAY. Stable for **3 s** without ROBOT CONTROL = points locked in.
5. **Recycle.** The DELIVERY HUMAN PLAYER pulls the lever, tips the tray back, sends SCOOPS down the CHUTE and throws the CONE home to STORAGE.
6. **Refill and check out.** Restock your FREEZER and park in (or on top of) your CHECKOUT ZONE as time runs out.
